Prueba Madrid

Start Date : 9:35
End Date : 13:35

Subject:

Create a complete calculator browser application. Your
application will need to handle at minimum algebraic
classical operation (addition, division, multiplication,
subtraction) and handle floating point numbers. We want to
be impressed by your application.

Stack: Javascript / HTML / CSS (Frameworks are allowed)

Your final work will need to be available on a GITHUB
public repository, you will have to send an email to
signal@42madrid.com with your login as subject email and
your URL repository as body message.

We need to receive this email before your end of exam
session.

Good luck 😎
